

# Zurn PEX<sup>®</sup> Performa<sup>®</sup>

## Radiant Barrier Tubing

Zurn PEX<sup>®</sup> Performa<sup>®</sup> Radiant Heat Barrier Tubing is the new and improved barrier tubing that is 30% more flexible than other barrier tubing products, making it substantially easier to handle and less time-consuming to install. It has an integral oxygen barrier and complies with ASTM F-876/F-877 and CSA B137.5. In addition to being more flexible, Performa is packaged on Zurn's exclusive QickCoil™ packaging system which maintains a larger diameter coil for shipping and storage. This minimizes the “coil memory” so that Performa lays flatter when it is uncoiled at the jobsite. Performa tubing is suitable for a full range of radiant applications in residential, commercial, and industrial applications. These include radiant heating, radiant cooling, and snow and ice melting.

### Layflat Technologies™

- Reduced coil memory

### Engineered Polymer Structure

- 30% improved flexibility
- Enhanced kink resistance
- Integral oxygen barrier

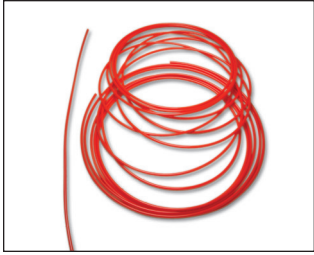

### Distinctive Product Packaging

- QickCoil™ packaging
- Integral uncoiler
- Self-storage
- Environmentally friendly

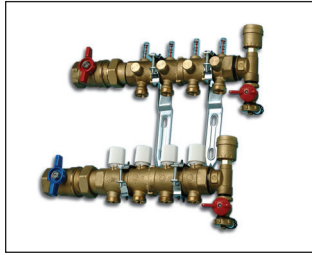

### Quality

- Manufactured to ASTM F-876/ F-877 and CSA B137.5
